

AGRICULTURAL AND APPLIED ECONOMICS: PROFESSIONAL OPTION, MS

This full-time, 12-21 month, on-campus professional master's option is designed to prepare students to fill the growing private sector demand for quantitatively-skilled analysts and managers. Students will learn skills in economic reasoning, data management, empirical analysis, and technical communication in order to find analytical positions in governmental, or non-governmental sectors. Students can choose coursework focused on applied economics or agribusiness management depending on their career goals. They can also take additional electives in AAE's focus areas of agriculture, international development, and environmental and natural resource economics. [Learn more.](#) (p. _____)
