

# NURSING PRACTICE: POPULATION HEALTH NURSING, DNP

This is a named option with the Nursing Practice, DNP (<https://guide.wisc.edu/graduate/nursing-school-wide/nursing-practice-dnp/>).

- The Advanced Practice Population Health DNP Track focuses on preparing students to provide the bridge between epidemiological data and the individual/family lived experience of health and illnesses, improve the health of communities by conduction of population and systems assessments, driving equitable distribution of health and health care resources, assure individual and community resilience to mitigate the impact of health risks related to environmental and planetary climate threats, activate equitable policies and solutions to health problems for populations by applying principles of social justice, and to use system-level methods to communicate public health information, influence behavior and improve health for varying audiences.
- Population Health students are also presented the opportunity to complete the Global Health Certificate Program and/or the Nurse Educator Certificate Program which complements the curriculum and sets graduates up to succeed in a teaching career.
