

# ART HISTORY, CERTIFICATE

The Art History Certificate is designed to meet twenty-first-century needs by promoting visual literacy in an increasingly visual world. Our classes teach critical and creative approaches to analysis, problem-solving, writing, and visual communication using a variety of artistic media, including painting, sculpture, architecture, photography, prints, ephemera, and the decorative arts.

Students earning the certificate will hone skills in visual analysis and interpretation that make them more competitive in a variety of fields, given the need for people who can think critically about visual cultural and visual storytelling.
