

BIOLOGY, BS (L&S)

The Biology major is designed for students with broad interests in the biological sciences. It is intended primarily to:

- prepare undergraduates for graduate studies in diverse areas of biology;
- prepare certain preprofessional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
- provide a broad exposure to biology for students who want a general science education as biologists; and
- serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Letters & Science and the College of Agricultural and Life Sciences (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/bacteriology/biology-bs/>).
